

## Self-Check 3

### Question

0/1 point (graded)

```
11  static void Main(string[] args)
12  {
13      int firstInt = 32767;
14      double firstDouble = 3276.7;
15
16      double myDouble = firstInt;
17      int secondInt = (int) firstDouble;
18  }
```

What is wrong with the conversion on line 17?

- ☒ Nothing is wrong with the conversion
- ☐ The conversion will result in a loss of data
- ☐ (int) should not include the parentheses
- ☐ The data type int is not required for secondInt due because of the (int) cast
