## Exception Self Check 2

### Question

1/1 point (graded)

What happens if an exception occurs in a method that contains no exception handling code?

- ☐ The common language runtime calls a default exception handler
- ☒ The exception is passed up the stack until it is handled, or the application crashes if no handler is present ✓
- ☐ The application returns an error code of 0 and terminates
- ☐ The exception is logged and application code continues executing

Submit

You have used 1 of 1 attempt
