What is the difference between the Console.Write() and the Console.WriteLine() statements?

○ Console.Write() outputs a newline while Console.WriteLine() does not

◉ Console.WriteLine() outputs a newline while Console.Write() does not ✔

○ Console.Write() outputs a newline while Console.WriteLine() does not

Explanation
Console.WriteLine() will output the contents you place in the parentheses and then will append a new line in the output as well.

What is meant by a nested loop?

○ A loop that includes both for and while statements

◉ A loop inside another loop ✔

○ A nested loop must consist of two for loops

○ A loop that includes both a while and a do while statement

Explanation
A nested loop is one loop inside another loop. The inner loop or outer loop can be any one of the available loop types.
